Cause of Emission Event or Excess Opacity Event, or Reason for Scheduled Activity:

During transfer of a Toluene / Naptha Mixture to a container, a fire started that spread to the entire container storage area.

Actions Taken, or Being Taken, to Minimize Emissions And/or Correct the Situation:

Firefighting commence immediately with local responder joined by community firefighters. The ditches and retention pond were blocked off to contain runoff from the event. After the fire was extinguished, efforts commenced to remove runoff from the containment areas via vacuum trucks to offsite disposal.

Basis Used to Determine Quantities and Any Additional Information Necessary to Evaluate the Event:

Emissions were calculated for the fire and spill release to air using conservative mass balance for materials noted in current container storage inventory record.
